

THE BEGIN AGAIN FOUNDATION IMPACT
(since inception)

BEGIN AGAIN FOUNDATION
FINANCIAL AID FUND

(formerly known as Leishline Financial Aid Fund)

This year we surpassed the **700+** mark of survivors who received a **one-time \$1,000 grant to assist with uninsured expenses** so they could focus on their recovery from sepsis, ARDS or toxic shock syndrome.

BEGIN AGAIN FOUNDATION
BEREAVEMENT FUND

(formerly known as Angel Fund)

To date, more than **92 grieving families** received grants to help with funeral, cremation and celebration of life services for their loved ones who lost their life to sepsis, ARDS or toxic shock syndrome.

BEGIN AGAIN FOUNDATION
TOXIC SHOCK PREVENTION PROGRAM

(formerly known as Period Planners)

We have expanded into more states across the U.S., reaching **more than 5,000 women facing housing insecurity** to safely care for their menses. In just three years, **more than 136,000 menstrual pads/liners, 5,400 packages of cleansing wipes, 5,900 pairs of underwear and 2,800 postpartum pads** were distributed through 30 different non-profit partners. 2023 saw the addition of post-partum pads. Now new mothers can safely care for themselves after delivery of their newborn.

LEILA ROSE FOUNDATION

40 families from Marc's home country of Australia have received **one-time \$2,500 grants to overcome obstacles in their battle with rare childhood cancer.**

NEW IN 2024

The Begin Again Foundation Fund is expanding. We are excited to announce our new partnership with Monash Children's Hospital in Victoria, Australia. We look forward to assisting families with sick children so they can focus on healing and recovery.

The Begin Again Foundation Amputee Fund will launch in early 2024. With 38 amputations a day occurring in the U.S. related to sepsis, we want to help navigate the long and costly road to recovery after an amputation. This fund will provide one-time \$1,000 grants to offset additional expenses like longer rehabilitation and prosthetics.

BEGIN AGAIN FOUNDATION
CASE MANAGEMENT

(formerly known as Leishline Case Management)

Our case managers have now helped **230+ sepsis, ARDS and toxic shock syndrome survivors** and **secured over \$301,000 in debt relief** so they can have better access to care and aren't burdened by financial crises while working towards recovering their health.

BEGIN AGAIN FOUNDATION FUND

(formerly known as Butterfly Blessings)

Begin Again Foundation Fund has supported nearly 6,000 families at Children's Hospital of the King's Daughters by **assisting with medical bills, housing payments, bus passes and funeral costs.**
